

Mind Game Changer

POWERFUL WITHIN

mindgmechanger.ae

Meet Our Founder

From an early age, I was captivated by the profound connection between the mind and healing - a passion inspired by my medical family and a soul-level curiosity for human potential. That path led me from the world of banking and corporate to where I truly belong: helping others awaken their inner power and transformation.

As a certified neuroscience coach, transformational and hypnotherapist, health coach, personal trainer, specialist in clinical psychology and being one of the Emirati pioneers in my field, I decided to help others by working at a subconscious level - where true change begins. My mission is to help you overcome your challenges and unwanted beliefs that no longer serve you to reconnect with your inner self and step boldly into the life you always wanted and meant to live.

I believe real success is born at the intersection of mental, emotional and physical alignment. Through a holistic, heart-centered approach, I'm here to help you rise with confidence, live with purpose, and experience transformation that's not just powerful - but permanent.

This is more than change. This is your return to self - and I'm honored to walk that journey with you.

Afnan Kazim

FOUNDER OF
MIND GAME CHANGER LLC

Vision, Mission & Purpose

Vision

Our vision is to be a pioneering force in the field of mindset transformation, leading the way in harnessing the power of the subconscious mind. We strive to set the standard for innovation, effectiveness, and impact in helping individuals achieve extraordinary breakthroughs.

Mission

At Mind Game Changer, we empower individuals to unlock their full potential by directly working with their subconscious mind. Our mission is to help clients break through mental barriers, overcome challenges, and achieve their goals with clarity, confidence and lasting transformation.

Purpose

Mind Game Changer exists to transform lives by reshaping mindsets. We help individuals break free from limiting beliefs, rewire their subconscious patterns, and cultivate a success-driven mindset - enabling them to thrive in every area of their life.
